

# Return to Margin

## Coldcut

People hold on -  
Everybody's looking for a meaning  
Everybody's doing their own thing  
And nobody's solving the problem  
Ain't nobody helping each other.  
Some people give in to fear  
Some people give into hunger  
Some of us live for the future  
Some of us wonder.  
Give a little light  
Give a little love  
Baby  
There's enough for everyone.  
Give a little hope and a little trust  
Maybe there's enough for everyone.  
People hold on  
Don't do yourselves wrong  
People hold on  
We've got to be strong  
People hold on.  
Everybody's getting frustrated  
Why should we live with this hatred?  
We are all dancing on a thin line  
They're making out we're having a good time.  
So who's gonna give us the answer  
Sister and brother?  
Give a little light  
Give a little love  
Maybe there's enough for everyone.  
People hold on  
Don't do yourselves wrong  
...  
Give a little light  
Give a little love  
...  
People hold on  
Don't do yourselves wrong  
...  
It won't be long  
People hold on  
We've got to be strong.
