

# We Got to Have Peace

Curtis Mayfield

We got have peace  
To keep the world alive  
And war to cease. We got to have joy,  
True in our hearts  
With strength we can't destroy. People please hear us (people please hear us)  
Through our voice the world knows  
There's no choice. We're begging save the children  
The little ones  
Who just don't understand Give them a chance  
To breed their young  
And help purify the land  
People please hear us (people please hear us)  
Through our voice the world knows  
There's no choice. And the people in the neighbourhood,  
Who would if they only could,  
Meet and shake the other's hand,  
Work together for the good of the land. Give us all an equal chance,  
It could be such a sweet romance.  
And the soldiers who are dead and gone,  
If only we could bring back one, He'd say "We've got to have peace"  
To keep the world alive  
And war to cease We got to have joy  
True in our hearts  
With strength we can't destroy  
People please hear us (people please hear us)  
Through our voice the world knows  
There's no choice And the people in the neighbourhood  
Who would if they only could  
Meet and shake the other's hand  
Work together for the good of the land Give us all an equal chance  
It could be such a sweet romance  
And the soldiers who are dead and gone  
If only we could bring back one He'd say "We've got to have peace"  
Aah - hah, we got to have peace. Let Let the world know it Peace, peace, peace  
Aah - hah, we got to have peace People please hear us (people please hear us)  
Through our voice the world knows  
There's no choice Save the children Save the children Save the children And the people in the  
neighbourhood  
Who would if they only could  
Meet and shake the other's hand  
Work together for the good of the land Give us all an equal chance  
It could be such a sweet romance

And the soldiers who are dead and gone  
If only we could bring back oneHe'd say "We've got to have peace"  
Lo - rd, we got to have peaceLet the people say itPeace peace peace  
Aah - hah, we got to have peace
