

# On God

## Kanye West

So much weight on your side  
Except when that's your Lord and Saviour, I reply  
Thy should love thy neighbor, not the bride  
I'm alright, that's on God  
His lights shinin' brightest in the dark  
Single mothers know they got my heart  
And all my brothers locked up on the yard  
You can still be anything you wanna be  
Went from more than four to more than three  
Thirteenth amendment, God it ain't end it, that's on me  
Need a good commander, ain't it chief?  
That's on Keef, that's on God  
Before the ranch, I had horses to put to the crop  
On the Forbes cover, but you're small garage  
They had the chain, then snatched it, that's all pride  
Oh my God, what's the lesson, all, we try  
When you thought the Book of Job was your job  
The devil had my soul, I can't lie  
Life gon' have some lows and some highs  
Throwin' Grammys, never get enough  
I wore my heart on my sleeve, I couldn't hide  
They know the pretty told me not to drive  
I place my head up every time I go to die  
But I survived, that's on God  
I can tell they else is someone [?]  
The greatest always wrestlin' over lies  
That's on L.A. Reid, that's on Christ  
That's on Jah, that's on God  
Off the three records he survived  
The IRS want your fifty plus our tithe  
Mandness over [?] or the black  
I feel tried, that's on God  
That's why I charge the prices that I charge  
I can't be out here dancin' with the stars  
No, I cannot left my family scarred, I go hard, that's on God
