Back Again (feat. RES)

Talib Kweli & Hi-Tek

Yes, original rhythm, the drum beater Hi-Tek in the house, Kweli in the house, yoNo matter where you're from

I will always be in your corner

Yeah, New York to California

The way we do it is fluid just like waterNo matter where you're from

I will always be in your corner

Life got a way of sneaking up on you

The way we do it is fluid just like waterCome on, beat on the drum like bang-bang

And tryna maintain the same frame of mind

While the game change

I know you sick of the same thing, we're different so

Stop sticking the needle up in the same vein

The definition of insane, my theory is Big Bang

We hunting for big game, the quick changeover

Got the rappers confused, Tek back on the board

Kweli is back in the booth, let's goNo matter where you're from

I will always be in your corner

That's right, we back again

You can like rap again

You can say that again, wordNo matter where you're from

I will always be in your corner

That's right, we back again

You can like rap again

You can say that again

You can say that again

It's independent hustle, it got me on my grind

I flex my pen like a muscle and write a battle rhyme

I got to exercise, I got to get the ghosts out

I got to testify, the legend never dieI'm connected to the struggle, got a little light

And this little light of mine I'm 'bout to let it shine

I get better with time, so right when you about to say

Something real slick you like never mindI stay grounded like airplanes that never fly

I still never come down, I'm forever high

My addiction is American as Devil's Pie

We stay where the snitches live and the rebels dieMen and women might try, numbers never lie

But I'm too fluid, there's no unit that I'm measured by

The nighttime when the ghetto come alive

And the artificial die like Yellow No. 5No matter where you're from

I will always be in your corner

That's right, we back again

You can like rap again

You can say that again, wordNo matter where you're from

I will always be in your corner That's right, we back again You can like rap again

You can say that againDon't it sound African how the voice and the track just blend

The hands get to clapping and the feet get to tapping and

The power I'm tapping into, it never was accidental

In fact, what a rap ascension to what make hip hop so special

You check my Hip Hop credentials, I'm on like I'm rap's potentialIt's what I've been sent to do, the task is monumental

These wack emcees make me laugh like Comedy Central

Rappers be acting gassed, it's really not a big issue

They'll lose their bodily tissue, cause something hot just hit you

Just for waving off the nigga tryna politic with youHe's like I gotta get him to try to politic with

him

Man, he tried to front

That's what he want when these shots hit him

Bet you he change his mindBetter learn how to read the danger signs

Try to take my spot, get a number, wait in line

Try to skip, no, get to the back again

Yeah, we back again, you can like rap again, wordNo matter where you're from

I will always be in your corner

That's right, we back again

You can like rap again

You can say that again, wordNo matter where you're from

I will always be in your corner

That's right, we back again

You can like rap again

You can say that again
