

# As Long As I Got You

Lily Allen

It seems like only yesterday you were with somebody else  
Soon as it was over though I had claimed you for myself  
Didn't take me long before I had moved my stuff to yours  
Glad to leave the past behind and I'm glad to close the door  
Because you know I love ya  
Because you know I love ya  
So far has been so good, it seems we stand test of time  
You never call me "baby" but you refer to me as "mine"  
What I like the best is how you can keep me on my toes  
Staying home with you is better than sticking things up my nose  
I had that awful feeling, that I needed help  
My life had lost its meaning, but you saved me from myself  
As long as I've got you and we can be  
together and forever just you and me, well that's swell  
You sleep with your mouth wide open and you go to the pub alone  
You only cook from frozen but I don't ever hear you moan  
You let me lie in bed when you're doing breakfast with the kids  
Landing on my feet with you, I'm so happy with is how we live  
Because you know I love ya  
Because you know I love ya  
I had that awful feeling, that I needed help  
My life had lost its meaning, but you saved me from myself  
As long as I've got you and we can be  
together and forever just you and me, well that's swell  
I had that awful feeling, that I needed help  
My life had lost its meaning, but you saved me from myself  
As long as I've got you and we can be  
together and forever just you and me, well that's swell  
As long as I've got you and we can be  
together and forever just you and me, well that's swell  
As long as I've got you and we can be  
together and forever just you and me, well that's swell  
As long as I've got you and we can be  
together and forever just you and me, well that's swell
