

Anybody's Window (Remix by 909)

Wolfsheim

Look through anybody's window
See everywhere the same
People suffering from hunger
A narcotising pain
Call it justice, call it fair
I just call it a mistake
Starving masses cry for help
In this state of decay
In this ruthless time
And they heard the favourite popsongs
To remind of times of wisdom
They heard a thousand voices say:
Satisfaction, fortune, health
So far away
Look through anybody's window
See everywhere the same
People suffering from hunger
A narcotising pain
Call it justice, call it fair
I just call it a mistake
Starving masses cry for help
In this state of decay
Looking people in their eyes
See the concrete bricks behind
See the false tears that they cry
Feel this sleeping guilt inside
Pray to heaven, pray to hell
Pray for reason, for a way
Public false asleepen eye
No longer dream of paradise
Look through anybody's window
See everywhere the same
People suffering from hunger
A narcotising pain
Call it justice, call it fair
I just call it a mistake
Starving masses cry for help
In this state of decay
