

# Morphine

## Lights

[Verse 1]

I had my first good dream  
Now that you're haunting me  
Here in between the sheets  
Right where our two worlds meet  
This must be the hour  
Right before the daybreak  
Leave behind the coldest blue ache  
I had my first good dream  
Now that you're here with me[Pre-Chorus]

When I call your name  
I don't feel the burn  
Standing in the flame  
Flame, flame, flame

[Chorus]

We end up on the floor  
You set my head free  
I want you more and more  
Don't wanna get clean  
You're like morphine  
You're like morphine  
You're like morphine  
You are my morphine[Verse 2]

We never leave the room  
I guess there's no need to  
Nothing but me and you  
Visions in bird's eye view  
This must be the morning  
Never saw it coming  
I was tangled up in your limbs  
We never leave the room  
Now that I'm here with you

[Pre-Chorus]

Again I call your name  
I don't feel the burn  
Standing in your flame  
Flame, flame[Chorus]  
We end up on the floor  
You set my head free  
I want you more and more  
Don't wanna get clean  
You're like morphine

You're like morphine  
You're like morphine  
You are my morphine[Outro]  
You are my morphine
