For the Win

We Are The In Crowd

I've got a way with words and it's the cause of all my problems I've got my mind set and that's the way it is I never thought it could get this bad when I had you in my pocket everything was just fine and...You've got a big mouth and the streets are talking about the way you walk around like you own the place you've got a big mouth and you should ashut it yeah, you should shut it in the first placejust, take another look at the risks we took and all the things i said what were they really worth you're all talk, you can't act like you're calling the shots I'm the only thing that you've gotWe don't have anywhere to go but up so sit back and watch us fall take it back, don't react don't ever forget we'll make it byI can't take another second of this goddamn town it's getting harder to sing... dodo do do do dodo These melodies of settling are starting to stingand everybody's talking like they know it all conducting social symphonies you're all talk you can't act like you're calling the shots I'm the only thing left you got We don't have anywhere to go but up so sit back and watch us fall take it back, don't react don't ever forget we'll make it byWe don't have anywhere to go but up so sit back and watch us fall take it back, don't react don't ever forget we'll make it byyou've got a big mouth and the streets are talking about the way you walk around like you own the place you've got a big mouth and you should shut it yeah, you should shut it in the first place verybody's got me looking in the wrong direction (all eyes on you, they're looking out for me)We don't have anywhere to go but up

so sit back and watch us fall take it back, don't react don't ever forget we'll make it byWe don't have anywhere to go but up so sit back and watch us fall take it back, don't react don't ever forget we'll make it byI can't take another second of this goddamn town it's getting harder to sing...
