

# Kiss You Up

Shontelle

(Intro: Woahhohohoh Woahhohohoh) You just have to say what you need  
And I'll hear you out  
You don't have to hang in a sea  
Cause I'll be a crowd  
I'm at your side  
To hold you up when you've fallen down Anytime that you want me around  
I'll be there at the speed of sound  
Anytime that you want me around  
I'm there Kiss you up  
Love you down  
Make you right through the night  
If you need a little love  
I'll kiss you up  
Don't ever change  
Cause I love...  
You the way that you are  
No matter how dark it may be  
I still think you are a star  
And if you break  
I will come and mend your sweet heart Anytime that you want me around I'll be there at the  
speed of sound  
Anytime that you want me around  
I'm there Kiss you up  
Love you down  
Make you right through the night  
If you need a little love  
I'll kiss you up  
And no higher feeling  
I don't need a reason to reveal it  
Remember to breath in  
Never stop believing  
You're extraordinary Kiss you up  
I love you down  
Kiss you up  
Said love you down  
Make you right through the night  
If you need a little love  
I'll kiss you up  
Make it right through the night  
If you need a little love  
I'll kiss you up
