

# Get Up Get Down

Phillip Phillips

Get up get down get a little bit closer to the scene  
Find out, what's there, something new you can see  
Get up get down get a little bit closer to me  
Find out what's there what you can be Yesterday was our time to turn back again  
And instead we went through the fire to get lost in sin  
Burn baby burn let me cool you down again  
Turn baby turn to see where it all begins Cause it's alright it's out there  
Go and get lost girl  
It's alright I'm out there  
Let me take control  
Get up get down move a little bit closer to the scene  
Find out, what's there, something new you can see there  
Get up get down get a little bit closer to me, girl  
Find out what's there what you can be Walking over tv on  
Let it take control love  
Every side inside your body each and every bone  
Burn baby burn let's cool it down again  
Turn baby turn to see where it all begins Yeah, it's alright it's out there  
Go and get lost girl  
It's alright I'm out there  
Let me take control Get up get down move a little bit closer to the scene  
Find out, what's there, something new you can see there  
Get up get down get a little bit closer to me, girl  
Find out what's there what you can be  
Na na na na na no  
Na na na na na no Get up get down just a little bit  
Get up get down just a little bit  
Get up get down let's get lost in this merry go round and round Na na na na na no  
Na na na na na no Get up get down just a little bit  
Get up get down just a little bit  
Get up get down find out what's there, find out baby you and me Get up get down move a little  
bit closer to the scene  
Find out, what's there, something new you can see there  
Get up get down get a little bit closer to me, girl  
Find out what's there what you can be Get up get down move a little bit closer to the scene  
Find out, what's there, something new you can see there  
Get up get down get a little bit closer to me, girl  
Find out what's there what you can be
