

# New Math

## Bo Burnham

It's New Math

What's a pirate minus the ship?

Just a creative homeless guy.

And an anteater plus a large hungry mutant ant

An ironic way to die.

And what's domain domain range

A kid with too much in his pants

And two balls, minus one

Seven titles at the Tour de FranceGet's worse...

Yo, split a decision with long division

Take the circumference of your circumcission.

Live like your data, when you're all set,

Put it all together, and whatever you get

It's New Math

It's New MathAnd what's a bag of chips divided by five?

Well that's a Nike worker's meal.

And Santa Claus multiplied by [i]

Well I guess that makes him real.

And the square root of the NBA

Is Africa in a box.

How do you trace a scatter plot?

You give the pencil to Michael J. Fox. Whatever

Take the approximate moral proportion

of the probable problem of a pro-life abortion

Live like your data, when you're all set,

Put it all together, and whatever you get

It's New, It's New, It's New, It's New, It's New Math

And if you took a factor tree

of the factors that caused my girl to leave me

You'd have a tree

Full of Asian porn.

CAL See you later

Mathematical minds make industrial smog

What's the opposite of LNX

Duraflame the unnatural lawSupport the farmers with a pro-tractor

Link Kennedy and Lincoln with a common factor

Live like your data, and when you're all set

Put it all together and whatever you get

It's New, It's New, It's New, All right, word problems, ready?

If there's a fat guy in a pastry shop

With a \$20 bill and he's ready to buy

In order to predict his volume change

You'll need to know the value of pi  
And there's a metal train that's a mile long  
And at the very back end a lightning bolt struck her  
How long til it reaches and kills the driver  
Provided that he is a good conductor  
And if 10% of men are gay  
20% of men are Chinese  
What are the odds that a man chosen at random on the  
Spends his free time and mealtime while on his knees?  
And if Kim is half as old as Bobby  
Who is two years older than 12 year old Tori  
For how many more 30 day months  
Will their threesomes be considered statutory rape?  
Cos math can be sexy  
Cos having sex is like quadratic expansion,  
if it can't be split then it's time to stop  
And having sex is like doing fractions  
It's improper for the larger one to be on top  
Having sex is like doing maths homework  
I do it best when I'm alone in my bed  
And squaring numbers are just like women  
If they're under 13 just do them in your head.  
It's New Math
