

# Bleed

## Out Came the Wolves

It's our life,  
It's our turn,  
Like a car wreck that's ready to burn.  
If we die then we die,  
But at least we can scream for our lives, If I bleed would you keep all my demons inside,  
If I bleed would you hold them tonight. There's no blood in this world,  
If we cant share the pain,  
So tell me what do you say,  
Could you bleed for me? Bleed for me.  
If they're mad,  
We don't care,  
We're the edge of the knife and they're scared,  
When they're old,  
They'll be fine,  
With no stories to tell no scars left to hide. If I bleed would you keep all my demons inside,  
If I bleed would you hold them tonight . There's no blood in this world,  
If we cant share the pain,  
So tell me what do you say,  
Would you bleed for me? You are my tourniquet,  
My veins are caving in,  
The opiate begins now right now. If I bleed would you keep all my demons inside,  
If I bleed would you hold them tonight.  
There's no blood in this world,  
If we cant share the pain,  
So tell me what do you say,  
Could you bleed for me? Bleed for me. So tell me what do you say,  
Could you bleed for me?
