

125

Stina Nordenstam

They shut down the experiment
It had long gone out of hand
But the nation's funds were well spent
To the pride of modern man 125 has crossed the channel
It's the finest thing man made
And existence as we know it
Has reached another grade We broke the code of meaning
Those who knew got paranoid
But we'll use our finest scientists
To get back in control 125 has crossed the channel
A proud and giant bird
Gliding like a condor
Above the simple earth
125 has crossed the channel
It's the finest thing man made
And existence as we know it
Has reached another grade
