## **After Ever After**

## **Jon Cozart**

If you've ever wondered why
Disney's tales all end in lies
Here's what happened after all their dreams came trueI loved being princess down in -- this
beautiful ocean blue

But mermaids are going missing -- they end up in someone's stew So just try to put yourself in -- to somebody else's gills You're killing my ecosystem -- with fishing and oil spills

Thank you BP, thank you BP

The British are killing, oil is spilling

Now I can't see... MY EYES!

Chinamen feast on Flounder's fins Plus the Japanese killed all my whale friends

Oceans are browning, I think I'm drowning

Thanks to BP YOU SUCK!

Hey, I'm OK, but I'm slightly scared My husband's a mark for the War on Terror Aladdin was taken by the CIA

We're not Taliban

You've got the wrong man

In Guantanamo Bay

Prince Ali, where could he be, drowning in wawa

Interrogation from the nation of the "free"

Bin Laden's taken the fall

We're not trained pilots at all

Jafar went crazy and no one put up a fuss

We're for freedom, Genie can vouch for us

Bush was crazy, Obama's lazy, al-Qaeda's not in this country

Set free my Prince Ali

A whore! A whore!

A whore, a whore!

This town's gone wild since I married Adam

They think I'm going straight to hell

But the charges laid on me

Of bestiality

Could wind up getting me thrown in a cell

No, I'm overrun by mad men

I hear they plan to burn me at the stake

They legit believe I'm Satan

And now I hear that PETA's gonna take my beast awayAfter John Smith traveled back to England

I helped my people cultivate the fields

More English, French, and Spaniards came to visit And they greeted us with guns and germs and steel They forced us into unknown lands of exile They pillaged, raped, and left us all for dead So now I'm far more liberal with a weapon When I separate their bodies from their heads Have you ever held the entrails of an English guy? Or bit the beating hearts of Spanish men? Can you shoot an arrow in some French guy's eyeball? Can you paint with the red colors in these men I can murder if I please Cause I'm dying of disease I can paint with the red colors in these menThanks to BP Where's Prince Ali? **Bestiality** I've got STDs Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
