

# The New Black

## Moon Taxi

I've seen it all, all before  
And now I want something more  
And what is that?  
It's the new black What you want, me to do  
Now you got, someone new  
It's not enough, to get your thrill  
You took it all, for one more kill And what is that?  
It's the new black I've seen it all, all before  
And now I want something more  
So what you give, you can't get back  
And everything is turning black  
It's the new black  
It's the new black
