

I Will (feat. Eves Karydas)

[Alex Adair](#)

[Verse 1]

I will love you like the fresh sun cuts into the snow
I will love you till the sun is settled, till the stars burn cold
I will love you like the first man
I will love you like the last
I will love you with each deafening heartbeat
Drowning from the past

[Chorus]
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will

[Verse 2]

I will love you like the anchors tug into the sea
I will love you like the silver shrapnel inching when you breathe
I will love you like the embers
I will love you like the flames
I will love you like the patient carbon sinking in your veins

[Chorus]

I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will
I will, I will, I will, I will

I will love you, I will
Love you, I will, love you, I will
Love you, I will, love you, I will
Love you, love you

I will love you, I will
Love you, I will, love you, I will
Love you, I will, love you, I will

I will
