

Mother Mother

Fat Freddy's Drop

My queen, my rock, my fire
You have more than man requires
For so long you watched them conspire
Who will sow the seeds of change Who will let them know
In the years to come
Say it won't be long
When it's said and done
She will still be standing
Same as it ever was
Same as it ever was
Say it won't be long
Raise up from the quiet earth
Dig out of the mount tonight
Back from the sleep so deep
Back to the verse of fire
Look to the east and west
To the north and south and beyond
To the stars that shine above me
Down to the rock below
Down to the ground we go Down to the ground
Down to the ground we go Down to the ground
Like a mother mother Everywhere I go
Everywhere I go
Like a mother mother
When our time is over
She'll be there to take us on
Like a mother mother
When it's all been said and done
She can spend some time alone
Like a mother mother
She'll be there
My queen, my rock, my fire Like a mother mother
