

Circle

Allen Stone

Time, what's with all this time?
The world rotates as I fall behind
Change, what's with all this change?
Years go by but I stay the same
Fear, what's with all this fear?
I push back but it always stays here
Pace, how can I keep this pace?
The damage done is now taking shape
Cause out of this circle, there are no corners to hide
Every line I follow lead me back inside
Gravity pulls me from the center every time
And gravity pulls me from my center every time
Home, where did I lose my hope?
Life moves quick when you're quick to
Faith, where can a man find faith?
The damage done is now taking shape
Cause out of this circle, there are no corners to hide
Every line I follow lead me back inside
Gravity pulls me from the center every time
And gravity pulls me from my center every time
