

# Blood, Milk and Sky

## White Zombie

The siren sings a lonely song  
Of all the wants and hungers  
The lust of love, a brute desire  
The ledge of life goes under Divide the dream into the flesh  
Kaleidoscope and candle eyes  
Empty winds scrape on the soul  
But never stop to realize Animal whisperings  
Intoxicate the night  
Hypnotize the desperate  
Slow motion light  
Wash away into the rain  
Blood, milk and sky  
Hollow moons illuminate  
And beauty never dies Running wild, running blind  
I breathe the body deep  
1, 000 years beside myself  
I do not sleep  
Seduce the world  
It never screams  
Dead water lies  
Ride the only one who knows  
Beauty never dies
