

# You Show Me Stars

Chris Mann

Last night is coming on  
Last breath before it's gone  
And all my angels have flown  
When shadows start to form  
When I have lost it all  
I call your name  
I call your name And you come to me with open arms of life  
You save me almost every single night just in time  
You show me stars in all of my dark hours  
You show me stars in all of my dark hours  
You show me stars (you show me stars)  
In my dark hours  
And through the hardest parts  
The beauty and the dark  
You hold the sun in your hands  
When I am burning out  
your halos all around  
Bringing me back  
Back to life And you come to me with highest form of life  
You save me almost every single night just in time  
You show me stars in all of my dark hours  
You show me stars in all of my dark hours  
You show me stars (you show me stars)  
In my dark hours You show me stars  
and wherever you lead  
I will follow you  
To where you are  
You take me from this place  
And bring me home  
(Home, I am home  
In your arms  
In your arms) I am home (I am home, I am home) Home (In your arms) In your arms  
In your arms You show me stars in all of my dark hours  
You show me stars in all of my dark hours And I am home (I am home)  
I am home (In your arms)  
In your arms  
In your arms  
And I am home (I am home)  
And I am home (In your arms)  
Home
