

Forever Fades Away

Tiger Army

It burns like a fire in the night
A glow that rises and becomes the starlite
Starlite Under the trees, in the night
you'll find it there
In the space between heartbeats
where the whole world disappears In a nightbloom garden
Our hearts did meet
Like the razor's kiss
That sealed our love And the flame still burns (forever)
And my heart still yearns (forever)
And in my dreams the fires blaze
But the embers fade (forever)
And the light grows faint (forever)
As forever fades away, forever fades away
Inside your dreams, you will see forever stare
It surrounds us but we cannot stay -
moments are all we have But in this moment we can live a lifetime here
All that's passed and shall come
falls away under the trees In a nightbloom garden
Our hearts did meet
Like the razor's kiss
That sealed our love And the flame still burns (forever)
And my heart still yearns (forever)
And in my dreams the fires blaze
But the embers fade (forever)
And the light grows faint (forever)
As forever fades away, forever fades away
In a nightbloom garden
Our hearts did meet
Like the razor's kiss
That sealed our love And the flame still burns (forever)
And my heart still yearns (forever)
And in my dreams the fires blaze
But the embers fade (forever)
And the light grows faint (forever)
As forever fades away, forever fades away
forever fades away
As forever fades away
forever fades away
forever fades away
As forever fades away
forever fades away
