

Nineteen

Buck-O-Nine

Not long ago, there was a time
When everything would blow my mind
Then I'd learn a bit more, learn a bit more
It canceled everything I learned before Said,? Hey, I don't know what I'm doing?
Should I plan on my class reunion?
I've been working on the vision of clarity
This is how it boils down to me Well, anything is possible
Yeah, anything and everything
Anything and everything Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, is possible to me
Well, was nineteen, I thought I'd seen
Everything I was gonna see
Then I'd see a bit more, see a bit more
Canceled everything I'd seen before Said,? Hey, I thought I knew it all?
I was setting up for a hell of a fall
Writing down my philosophy songs
There's one that still holds strong Said, anything is possible
Yeah, anything and everything
Anything and everything Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, yeah, is possible to me
With everyday that goes by
The less and less, I wonder why
'Cause I've seen 'em rise and I've seen 'em fall
But I'll never claim to have seen it all I said,? Hey, I ain't seen a thing?
You never know what tomorrow will bring
Been working on a state of mind
Brace yourself for the ride 'Cause anything is possible
Yeah, anything and everything
Anything and everything Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, is possible, is possible
Is possible to me, to me, to me, to me
