

# I Miss You (feat. Bahari)

Grey

I used to know you better, better than anyone  
Now I don't know you at all  
You used to keep my secrets, shallow has turned to deepness  
Now I got someone else to call Just 'cause I don't make a thing about it  
Don't mean that I never think about it, 'cause I do  
Just 'cause I learned how to live without you  
Don't mean that I ever really wanted to, oh I miss you, yeah, yeah  
After all that we've been through  
I never told you that I do  
But I miss you, ooh  
Even after all this time  
I got your body on my mind  
This might seem out of nowhere, I get it if you don't care  
Guess I just don't know what to say  
Don't know if you remember that night in late September  
For me, it feels like yesterday
