

# History

## Cosmo's Midnight

From another life  
I thought of you, I can't deny  
But the minute that I realized  
That you were means to an end  
And I wasn't gonna pretend  
Then you ran and reappeared  
You're no longer just a souvenir  
Taking all the words I wanna hear  
Your hands wandering in the [?]  
And now you can't take it back  
'Cause we got too much history  
And all you wanna do is fuck with me  
But we got too much history  
Too wake up in my bed  
With you lying next to me  
With you lying next to me, oh-oh  
With you lying next to me, me  
'Cause we too much history  
With you lying next to me  
With you lying next to me, oh-oh  
With you lying next to me, me  
'Cause we too much history Your every wish is my command  
With the Gin and tonic in your hand  
Only words that me and you can understand  
But then when nobody knows  
We're already in the cab home  
'Cause we got too much history  
And all you wanna do is fuck with me  
But we got too much history  
Too wake up in my bed  
With you lying next to me  
With you lying next to me, oh-oh  
With you lying next to me, me  
'Cause we too much history  
With you lying next to me  
With you lying next to me, oh-oh  
With you lying next to me, me  
'Cause we too much history  
With you lying next to me  
With you lying next to me, oh-oh  
With you lying next to me, me  
'Cause we too much history We got to much

History, oh  
We got to much  
History, yeah
