

# Slaughterhouse Road

## Mushroomhead

Everybody else steeped in wonder  
As I finish out my stride  
What you cannot put asunder  
The struggle to survive I see idiots and hypocrites  
Can't cut me down to size  
And I'll be god damned if you'll take me alive  
Casualties grown  
Feeding the Earth, no one knows  
Build greater hope  
Yet feed the slaughter our souls I'd rather live than believe in eternity  
Forget, forgive, forget, forgive  
No discerning the fire that burn me  
Forget, forgive, forget, forgive  
I'd rather live than believe in eternity  
Forget, forgive, forget, forgive  
There's no cure for mankind  
Forget, forgive, forget, forgive  
Casualties grown  
Feeding the Earth, no one knows  
Build greater hope  
Yet feed the slaughter our souls  
Feeding a bottomless hole  
Bleeding our youth for the gold  
On the slaughterhouse road  
You can't end the war  
Or compensate for the loss  
You can't erase the scars  
We can't restore the face  
Of a nation behind bars  
Of a nation behind bars  
Of decades laid to waste  
Of decades laid to waste  
On the slaughterhouse road, slaughterhouse road  
On the slaughterhouse road, slaughterhouse road  
Everybody else steeped in wonder  
As I finish out my stride  
What you cannot put asunder  
The struggle to survive I see idiots and hypocrites  
Can't cut me down to size  
And I'll be god damned if you'll take me alive
