

# I Found You

## Solarstone & Meredith Call

Hey, There's another way down this road,  
We're getting closer, to the place where we belong,  
Under the stars, familiar,  
Now we are here, we can be who we are. In the darkness I found you,  
All that matters, is how you want to live your life,  
Every wrong turn, taking it slow with you,  
And I'm going to be there by your side. Hey, a believer of everyone,  
I've got a feeling, you can hear us with your song,  
Darling you're one in a million,  
and you've got to know that, it was in you all along.  
In the darkness I found you,  
All that matters is how you want to live your life,  
Every wrong turn, taking it slow with you,  
And I'm going to be there by your side.
