Colour  
Red, Blue  
Orange, Violet  
Green, Blue, Red, Blue  
Grey Blue White  
Yellow Blueberry Turquoise White  
The world of colour  
Colour, the touchstone of reality  
Colour to excite the mind  
The vivid, pulsating miracle that gives substance to shadow  
One of the outstanding scientific and artistic triumphs of the twentieth century  
Now there is colour everywhere  
Colour within the reach of everyone  
It happened with a suddenness that rocked the civilised world  
The entire world will stream into our living rooms with the velocity of light  
Spectacularly  
The cube with the heart of a rainbow  
All the glory, all the reality of nature  
I believe in this world to come, I think it's going to be a pretty good world  
Who knows what miracles are yet to come  
A bright new era dawning  
Colour, the fabric of the rainbow riding piggyback on that invisible stream of electrons  
When the magic light of tomorrow comes into its own  
Our era, a new era of television  
Red, Blue  
Orange, Violet  
Green, White
