

Brighter Than the Sun

Brick + Mortar

I'm brighter than the sun
But I can't wait
You're asking me to stay
I can't escape
I'm staying up all night
To sleep all day
I'm brighter than the sun
But then one day All the things that the people say
All the things that the people say
The people say
The people say,
"Whoa"
Look, they're lying
They can barely deny
We're not driving
We're just hitching a ride How'd we get here
They can barely deny
We're not driving
We're just hitching a ride I can't seem to find what
We came here for, back, around
New to me now to say,
"No no more," back, around All the things that the people say
All the things that the people say
The people say
The people say,
"Whoa"
Look, they're lying
They can barely deny
We're not driving
We're just taking a ride How'd we get here
They can barely deny
We're not driving
We're just taking a ride I'm brighter than the sunshine
I'm bright as I burn
I burn away All the things that the people say
All the things that the people say
The people say
The people say
All the things that the people say Have you ever had a daydream
Leaking through your day?
Have you ever had a nightmare
Bigger than everybody?

Have you ever had a dog
That you know won't go away?
Have you ever had a nightmare? We're not driving
We're just taking a ride
Look where I am
They can barely deny The whole world now
We can barely divide
We're not driving
We're just taking a ride Brighter than the sunshine
Brighter as I burn, I burn away
