My Space Baby (feat. Cherub)

DJ Premier

Space baby, you got no planet Space baby, you got no planet Got no home to give a name No air to breathe, but just the same I dig my atmosphere machine Space baby, you been so far Unknown face on an unknown star The time is now my life's begun I'm burnin' green like a rhomboid sun I've never seen a flower growIt's a mystery to me just how my being came To be and why it came here Maybe I'm not even human but I know There's lots of room infinity There's got to be a time and place For me to cease this endless search And settle down with my own race And never, ever, ever be a Space Baby
