

# Girls

## Nizlopi

They go deep  
With their love and fear  
They go deep  
And never disappear  
If you rub yourself for long enough  
You'll get down to their code of emotion  
Straight to your heart  
Sweet darlin'  
Straight to your heart You've gotta love and forgive  
Or you can't breathe  
You've got to search and be with  
Or you can't breathe  
I got something to give  
Before I leave  
That I could never rub out  
[Musical Interlude] I'm smothered in  
Memories, and you are too  
What is given back  
We can't unglue  
All this sticks to me  
Some days sweet like honey  
Some days tart like marmite  
Sticks to your heart  
Sweet darlin'  
Straight to your heart You've gotta love and forgive  
Or you can't breathe  
You've got to search and be with  
Or you can't breathe  
I got something to give  
Before I leave  
That I could never rub out  
The craft, the craft  
Of laughs and searching  
The path, the path  
Of always searching  
All from the heart  
All from the need  
All from the love  
All from the bleed The craft, the craft  
Of laughs and searching  
Right from the, right from the heart  
All from the need

All from the love  
All from the bleed I tell you this old heart is covered in glue  
And I could never rub out or forget you I tell you this old heart is covered in glue  
And I could never rub out or forget you You've gotta love and forgive  
Or you can't breathe  
You've got to search and be with  
Or you can't breathe  
I got something to give  
Before I leave  
That I could never rub out
