## **Modern English**

the rhythm of the rain gives an off beat on the window pane like an angel crying from the sky I can see its beauty after the snow I can see its beauty after the snowthe temperature's dropping rapidly normal service will shortly be resumed I can see its beauty after the snow I can see its beauty after the snow after the snow I stood and watched the dark sky rise with glaring sunlight in my eyes I thought of all the times gone by and laughed aloud at the crimson sky after the snow after the snow after the snow after the snowafter the snow there's something born after the snow after the snow the rhythm of the rain gives an offbeat on the window pane like an angel crying from the sky I can see its beauty after the snow I can see its beauty
