All I Ever Need

Austin Mahone

Don't the water grow the trees Don't the moon pull the tide Don't the stars light the sky

Like you need to light my life

If you need me anytime You know I'm always right by your side

See I've never felt this love

You're the only thing that's on my mindYou don't understand how much you really mean to me

I need you in my life

You're my necessity

But believe me that you're everything

That just makes my world complete

My love is clear the only thing I love

You're all I ever need

Baby you're amazing

You're my angel come and save me

You're all I ever need

Baby you're amazing

You're my angel come and save meDon't the water grow the trees

Don't the moon pull the tide

Don't the stars light the sky

Like you need to light my lifeWe can do anything we life

I know we both can get it right tonight

You got your walls built up high

I can tell by looking in your eyes

You don't understand how much you really mean to me

I need you in my life

You're my necessity

But believe me that you're everything

That just makes my world complete

And my love is clear the only thing I loveYou're all I ever need

Baby you're amazing

You're my angel come and save me

You're all I ever need

Baby you're amazing

You're my angel come and save meWhen it comes to you

Baby I'm addicted

You're like a drug, no rehab can fix it

I think you're perfect even with your flaws

You ask what I like about you

Ooh, I love it all

When it comes to you

Baby I'm addicted You're like a drug, no rehab can fix it I think you're perfect even with your flaws You ask what I like about you Ooh, I love it all You're all I ever need Baby you're amazing You're my angel come and save me You're all I ever need Baby you're amazing You're my angel come and save meYou're all I ever need Baby you're amazing You're my angel come and save me You're all I ever need Baby you're amazing You're my angel come and save me Song Discussions is protected by U.S. Patent 9401941.
