

Fear Inoculum

TOOL

Immunity long overdue
Contagion I exhale you
Lying I opened up to you
Venom in mania
Now, contagion I exhale you
The deceiver he says
you belong to me
You don't want to breathe the light of the others
Fear the light
Fear the breathe
Fear the others for eternity
But I hear them now inhale the clarity
Hear the venom, the venom in what you say, inoculated
Bless this immunity
Bless this immunity
Exhale, expel
Recast my tale
Weave my allegorical elegy
Enumerate
All that I'm to do
Calculating steps away from you
My own mitosis
Growing through delusion from mania
Exhale, expel
Recast my tale with my allegorical elegy
Forfeit all control
You poison
You spectacle
Exorcise the spectacle
Exorcise the malady
Exorcise the disparate
Poison for eternity
Purge me and evacuate
The venom and the fear that binds me
Unveil now
Lift away
I see you running
Deceiver chased away
A long time coming
