Let me take a minute to explain to you  
All this time you've been in my corner like a trainer  
Now you down, think it's time that I return the favour  
As long as we got each other, what's there to be afraid of? Cause I'ma ride witcha no matter what  
And if the car ran out of gas break out the chucks  
The we can walk it out, walk it out  
Real bitches know what I talk' about  
And I will never leave you, in times like these  
Is when you need most love, in times like these  
And I will be your shoulder, in times like these  
Know I do what I gotta do, in times like these  
Times like these, in times like these  
When you need the most in times like these  
I will be your shoulder, in times like these  
In times like these, in times like these When I say what I tell ya, you know I really mean it  
Nothin' or nobody ever gonna come between  
Yeah, cause you're my nigga  
Finger on the trigger  
And if some shit's about to go down  
Know I'm goin' out witcha  
And I will never leave you, in times like these  
Is when you need most love, in times like these  
I will be your shoulder, in times like these  
I'll do what I gotta do, in times like these  
In times like these, in times like these  
When you need the most love, in times like these  
Like Kobe and Vanessa in times like these  
I wonder what I gotta do, in times like these  
In times like these Said I'm in it for the long haul  
If you fall, I fall, then we both fall  
But if you ball, I ball, then we both ball
