

# Cold in California (feat. Gavin Haley)

Ashe

[Verse 1]

Just out of reach is the gold you're rushing for  
With bags under your eyes  
I've been chasing a rainbow, wound up at your door  
Wanna see the other side[Pre-Chorus]  
It's not quite like I imagined, like I did before  
When you're pouring all your heart out  
But you're lying on the floor  
All the cigarettes and hotels  
Could be what you're looking for  
But it's not what you expected  
And you're left wanting more

[Chorus]

Don't mind what anybody told ya  
It still gets cold in California  
See, everybody thinks they know ya  
They're only seeing what they wanna  
Oh, don't mind what anybody told ya  
It still gets cold in California[Verse 2]

We can dance in the streets  
With the sun upon our skin  
And wake up feeling burned  
Under stars, we can freeze  
'Cause we've gotten used to heat  
Where seasons never turn

[Pre-Chorus]

It's not quite like I imagined, like I did before  
When you're pouring all your heart out  
But you're lying on the floor  
All the cigarettes and hotels  
Could be what you're looking for  
But it's not what you expected  
And you're left wanting more

[Chorus]

Don't mind what anybody told ya  
It still gets cold in California  
See, everybody thinks they know ya  
They're only seeing what they wanna  
Oh, don't mind what anybody told ya  
It still gets cold in California[Bridge]

Talk about the pretty parts, the ones you see on film  
Happiness and skinny legs and living on a hill

Don't talk about the ugly parts, the loneliness you feel  
You probably always will[Chorus]  
'Cause it gets dark in California  
I know it well, better than most, yeah  
Don't mind what anybody told ya  
It still gets cold in California  
See, everybody thinks they know ya  
They're only seeing what they wanna  
Oh, don't mind what anybody told ya  
It still gets cold in California
