

Fade to Nothing

Rag'n'Bone Man

Don't you be so foolish
Think that i'll be around
When you made your mind up
With your feed on solid ground I could be anyone, anyone
As long as you are every single thing you want
Think you can run in there
Sure all along
That's where you got me wrong How many times can we put ourselves through this world
Like all the lovers that been here before
How many times can we watch this fade into nothing
No nothing, no nothing at all
Don't ask for my opinion
You can face the truth
Everytime I leave myself open
You lie on me to lose I could be anyone, anyone
As long as you are every single thing you want
Think you can run in there
Sure all along
That's where you got me where wrong How many times can we put ourselves through this world
Like all the lovers thar been here before
How many times can we watch this fade into nothing
No nothing, no nothing at all Why do we sit and suffer
Through our darkest days
It's time we play it over
We make the same mistakes
And that's where we got this wrong
How many times can we put ourselves through this world
Like all the lovers that been here before
How many times can we watch this fade into nothing
No nothing, no nothing at all
