

# Face the Night

## Hardline

Remember when our love was strong  
Through the toughest times nothing could go wrong  
Now I'm gone and the wheels turn on and on  
In the hopes of a dream that came from a song  
But nothing in this world makes me feel like you do  
No matter what life could bring me  
Let it bring me right back to you(Refrain:)  
And I won't let you face the night alone  
Easy come never easy go  
I won't let you face the night alone  
I'm coming back I'll never forget that look in your eyes  
Standing on your doorstep I was home for good tonight  
As time slipped away the boys they played on  
Their dreams turned to gold that came from a song  
But nothing in this world means more to me than you  
No matter what life could of bought me  
It brought me right back to you  
(Refrain)
