Face the Night

Hardline

Remember when our love was strong Through the toughest times nothing could go wrong Now I'm gone and the wheels turn on and on In the hopes of a dream that came from a song But nothing in this world makes me feel like you do No matter what life could bring me Let it bring me right back to you(Refrain:) And I won't let you face the night alone Easy come never easy go I won't let you face the night alone I'm coming backI'll never forget that look in your eyes Standing on your doorstep I was home for good tonight As time slipped away the boys they played on Their dreams turned to gold that came from a song But nothing in this world means more to me than you No matter what life could of bought me It brought me right back to you (Refrain)
