

# Down From the Rafters (Huxley Remix)

## Hundred Waters

I woke free  
From something clutching me  
Pulled its awful, leaden, cold, clammy body  
Out away from me And the light that came out, came out  
Came out  
But to survive, how can I? I've wandered through water  
Since the morning I heard you  
You were half alive, but that mud inside  
Is the same mud that makes me love you  
Only after after all the fog has long dissolved  
Take a little pill, drown it out in laughter  
Take a little pill, maybe think about it after Cause every morning's like a climb from the rafters  
Take a little pill, drown it out in laughter  
Take a little pill, maybe think about it after Think about it after Delude  
Dementia  
Make it feel  
Like I never met ya  
Delude  
Dementia  
To make it feel  
Like I never met ya
