

Fall Together (Kasbo Remix)

The Temper Trap

You and me know we're meant to be
Maybe we'll never know
You and me are worst enemies
Cause we don't believe anymore
Out on the streets
Our colors bleed
Nobody speaks to me
Here I am, give me something I could follow
So I can find my way out from the shadows
Raise your voice cause the time is now or never
And if we have to fall, we'll fall together
Shallow dreams will tell me everything
I've been listening, but all I heard is you
Pull the strings
And you'll do anything
To keep me hanging on your every word
Out on the streets
Our colors bleed
Are you the one to speak to me?
Here I am, give me something I could follow
So I can find my way out from the shadows
Raise your voice cause the time is now or never
And if we have to fall, we'll fall together
Find this door
Close it
We're miles off coast from where we're headed
To break our fall
It's the final call
It's the final call
It's now or never
Here I am, give me something I could follow
So I can find my way out from the shadows
Raise your voice cause the time is now or never
And if we have to fall, we'll fall together
