

All Night (feat. Ally Brooke) [Festival Mix]

Afrojack

Out of my mind, out every night
Just so I could feel this way
Out of control, irrational
Now that you're stuck on my brain
Something 'bout the way you're following my lead
Says you wanna leave the party with me
I been hearing love songs playing in my dreams
I got your name written all over me, oh
We're in it together
An infinite high
And we can keep on dancing all night
We don't need forever
But now it feels right
Yeah, we can keep on dancing all night
And we can keep on dancing all night
Yeah, we can keep on dancing all night
Where have you been? Been wondering
It's like I knew you from the start
Don't leave for long but if you're gone
I'm so good when we're apart
Something 'bout the way you're following my lead
Says you wanna leave the party with me
I been hearing love songs playing in my dreams
I got your name written all over me, oh
We're in it together
An infinite high
And we can keep on dancing all night
We don't need forever
But now it feels right
Yeah, we can keep on dancing all night
And we can keep on dancing all night
Yeah, we can keep on dancing all night
We're in it together
An infinite high
And we can keep on dancing all night
We don't need forever
But now it feels right
Yeah, we can keep on dancing all night
Yeah, we can keep on dancing all night
We're in it together
An infinite high
And we can keep on dancing all night
We don't need forever
But now it feels right
Yeah, we can keep on dancing all night
